INDUCTION PROCESS

Step 1 — Welcome & Introduction (Day 1)

Meeting with Brendan Parker (Director) — in person or via video call
Overview of Brightly operations, property types, and guest expectations
Review of contractor terms, pay structure, and scheduling process
Walkthrough of Connecteam: job acceptance, checklist completion, photo submission
Issue of kit and consumables
Hand over and confirm receipt of all signed documents (pre-start checklist)

Step 2 — SOP Review & Knowledge Check (Before Shadow Clean)

Read and sign: Master Housekeeping SOP (B-ABNB-SOP-004)
Read and sign: Linen & Laundry SOP (B-ABNB-SOP-005) — rented linen model
Read and sign: Consumables & Amenity Restocking SOP (B-ABNB-SOP-006)
Read and sign: Pre-Guest Arrival Inspection Checklist (B-ABNB-QC-001)
Review: Cleaner Quick Reference Form (B-ABNB-REF-001)
Verbal knowledge check on: cleaning sequence, linen handling, chemical safety, issue escalation

Step 3 — Chemical Safety Induction

Chemicals supplied by Brightly are commercially labelled — review all labels
Safety Data Sheets (SDS) are held by Brendan Parker and available on request
Never mix chemicals — never use bleach with ammonia-based products under any circumstances
Correct PPE for each chemical: rubber gloves (mandatory), safety glasses (when spraying above shoulder)
Storage: all chemicals to remain in supplied, labelled containers only
Spill response: isolate area, ventilate, contact office

TRAINING — CLEANING STANDARDS

Brightly standard is hotel-quality on every clean. The following are non-negotiable:

Sequence of Clean

1. Arrival: confirm vacant, entry photo, walk-through, report damage
2. Strip: all beds stripped, towels collected, bins emptied, linen bagged for hire supplier
3. Kitchen first — full clean before moving to other areas
4. Bathrooms — full clean per room in sequence
5. Bedrooms — make beds (fresh hire linen), dust, vacuum
6. Living areas — dust, vacuum/mop, arrange soft furnishings
7. Final check — all rooms, photo of every room, lock up, submit job in Connecteam

Non-Negotiable Standards

Linen: hotel fold, wrinkle-free, symmetric presentation on every bed
Bathrooms: toilet sanitised, glass and mirrors streak-free, floor mopped (no hair)
Kitchen: benches, stovetop, sink, floor — all clean and dry before you leave
No cleaning products left visible in any room
All consumables restocked to standard (toilet paper, soap, shampoo/conditioner)
Property locked: windows locked, lights off, door secured on exit
Photos: every room photographed and submitted before marking job complete

TRAINING — LINEN HANDLING (RENTED MODEL)

Brightly uses a rented linen model. You do not wash, own, or store linen. See full SOP B-ABNB-SOP-005. Summary:
Fresh hire linen is delivered to the property or Brightly base before each clean
On arrival: strip all used linen (sheets, towels, bath mats) into hire supplier collection bags
Tag and report any stained or damaged items — do NOT discard hire linen
Make all beds with freshly delivered hire linen — never re-use unchecked linen
Place dirty linen collection bag at agreed collection point (see job notes)
If linen has not arrived: call office immediately — do not begin clean
Record linen received and returned on every job in Connecteam

SHADOW CLEAN PROCEDURE

All new cleaners must complete a minimum of two supervised shadow cleans before solo deployment. A shadow clean is a full clean completed alongside an experienced Brightly cleaner or the Director.

Shadow Clean 1 — Observation & Assist

New cleaner accompanies experienced cleaner or Director
Observe: complete cleaning sequence, linen handling, use of checklist, photo submission
Assist with tasks as directed — focus on learning standards, not speed
Debrief at end of clean: feedback on observations, questions answered

Shadow Clean 2 — Lead Clean with Supervision

New cleaner leads the clean from start to finish
Supervisor observes without directing unless a standard is missed
Supervisor completes QC Audit Form (B-ABNB-QC-003) against the new cleaner's work
Score of 80%+ required to proceed to solo deployment
If below 80%: further shadow clean(s) scheduled, specific areas identified for improvement
A third shadow clean may be required if the Director is not satisfied with the standard demonstrated. There is no guarantee of deployment after two shadow cleans if standards are not met.

SIGN-OFF BEFORE SOLO DEPLOYMENT

Before a cleaner is cleared for solo deployment, the following must all be complete and confirmed by the Director:

- ☐ All pre-start documents completed and filed

- ☐ All SOPs read and signed
- ☐ Chemical induction signed
- ☐ Connecteam tested and operational
- ☐ Shadow Clean 1 completed — debrief conducted
- ☐ Shadow Clean 2 completed — QC audit score 80%+
- ☐ Director has confirmed: cleaner is ready for solo deployment
